## Cover Letter — Application for [Position Name]

Dear Hiring Manager,

I am writing to express my strong interest in joining your organization. With over 20 years of experience in the technology industry, I have developed a rare combination of skills in Project Management, Data Science, Electronic Payments and Team Leadership — a profile that makes me a truly versatile professional in today's competitive market.

Currently serving as Project Coordinator / PMO / Scrum Master at FIS (Fortune 500, formerly TSYS/GlobalPayments), I coordinate global strategic programs, automate Power BI analytical dashboards for senior leadership and manage cross-functional teams. I am simultaneously advancing my Data Science credentials at Xperiu School with advanced training in Power BI, DAX, SQL Server and Generative AI.

Key career highlights: rescued 13 stalled projects at FastProBR (100% delivered on time), led global payment integrations at Unlimit (VISA, Mastercard, AMEX, ELO with BACEN/CIP compliance) and delivered web projects for 200+ clients across Brazil, USA and Europe.

◆ FIS / Fortune 500 · ◆ 20+ Years in Tech · ◆ 13 Projects Rescued · ◆ Trilingual PT/EN/ES · ◆ Available for Global & Remote Roles

I am fluent in Portuguese, English and Spanish with proven experience in multicultural global teams. I hold certifications from Google PM, PMI Agile, Microsoft and specialized courses in Generative AI. I am confident that my unique combination of project leadership, data analytics, fintech expertise and people management adds immediate value to your organization.

**Available for a conversation at your earliest convenience. I will respond within 24 hours.**

Sincerely,

## Rodrigo Macedo de Miranda
